

hyaluronate and bacitricin; and vi) sodium lauryl sulfate, sodium salicylate, disodium edetate, sodium hyaluronate, oleic acid and gamma linoleic acid.

35. The method Claim 27, wherein said insulin is administered in an effective amount. --

## **REMARKS**

The present case contains newly added claims directed to methods for administering insulin to the buccal region, specifically the buccal mucosa, using a metered dose inhaler. Support for the added claims is found throughout the specification as filed, for example, on page 22, lines 25-30. It is submitted, therefore, that no new matter is added.

Respectfully submitted,

Diane R. Meyers
